StingRay RF Over Fibre

CWDM, up to 50 km distance, Genus L-band modules with LNB powering (on TX module)

The StingRay CWDM Genus 1U Series of L-band RF over fibre units are designed to provide compact fibre links, with eight wavelengths (up to 16 wavelengths contact ETL) on a single fibre cable, with an optical budget of 12 dB. The transmit modules benefit from a high and wide dynamic range with automatic link optimisation ensuring high quality L-band transmission.

The StingRay CWDM system comprises of transmit modules and a multiplexer module to combine up to 8 wavelengths on to a single fibre cable at the transmit end. A demultiplexer module and receive modules are then used at the receive end to split the separate wavelengths.

For more wavelengths and longer distances, please contact us.

Typical applications:

- Ku-band and Ka-band ready for HTS applications
- Distribution of comms traffic across site with minimal loss
- General satcoms - teleports, video head-ends, TVRO
- Compact solution for small quantity links such as tactical HQ
- A resilient solution for satellite teleports with transmission distances up to 50 km

Local control & monitoring via HMI high resolution touchscreen

Compact housed in a 1U high chassis with capacity for up to 17 modules

Variable voltage 13/18VDC, 22 kHz tone up to 500mA to LNBs

Hot Swap & replaceable modules

Field replaceable Internal 10MHz reference source and external reference inject port

Remote control & monitoring via RJ45 Ethernet port with SNMP
